

WHAT IS REMIND?

Remind is a one-way email or text message service. We are using three different school groups; Elementary Parents, MS Parents, and HS Parents/Students. We recognize your desire not to be bothered with information you don't need, so we will carefully release information only to the correct target group. We anticipate sending reminders about alternate schedule days, school events, weather closings/early releases, and other school news briefs.

What makes Remind safe?

Students And Parents Never Have Access To Your Personal Cell Number

Teachers never see parent/student phone numbers, and parents/students will never see their teacher's phone number.

Remind messages are sent via an anonymous phone number. Cell phone numbers and carriers are in no way connected to any messages.

A Teacher Never Has Access To A Student Or Parents Personal Information

Parents & students (high school) subscribe to receive building level messages by sending a text or email from their personal device with a building code.

Once subscribed, they can only be identified by their name.

No Individual Messaging

All messages sent with Remind go to the entire building group. Teachers cannot directly communicate with one student.

This prevents any form of bullying, favoritism, or inappropriate conversation between teachers and students.

One-Way Messaging

Parents and students can't reply to teachers. This allows schools to focus on communication with their parents and students (high school only) without worrying about managing another inbox.

Logged And Secure Communication

All messages sent are saved in a secure account. Remind uses industry standard practices, including SSL, to keep our service secure and backed up.

Private And Confidential

Remind does not sell or share information about students, parents or teachers. Personal information remains private and confidential.

See reverse side for details on how to sign up to receive Rib Lake messages.
