

School District of Rib Lake
JOB POSTING
TECHNOLOGY EDUCATION TEACHER

Job Description: The School District of Rib lake is seeking applicants for a full-time technology education instructor. The ideal candidate will have strong communication skills, a background in welding and construction practices, and a desire to infuse technology into a project based environment. The school district is also looking for an applicant that has an understanding of teaching a skills based curriculum while developing strong workplace skills in students. Many work based partnerships, post-secondary credit offerings and community partnerships are already in place.

The Rib Lake School District technology education program is housed in excellent facilities. The program has a separate wood shop, metals shop, and mechanics area. The classroom area houses a computer mini-lab dedicated to applying technology to the manufacturing and construction focus. The Rib Lake Schools campus also lends itself to teaching practical construction experiences on site.

Coaching and advisory positions also available.

Qualifications: Candidates must hold or be eligible for a Wisconsin Tech Ed license.

Start Date: August 22, 2018

How to Apply: Apply through WECAN
