

Playground Update

Currently the school district is in the process of getting our site ready for the new playground and we are on pace to have this installed by the first day of school. We are very excited and humbled by the generosity of our community to bring this idea of a new playground a reality for all of our students.

Below is a picture of our last playtime on the old playset and a rendering of the new playset that will be installed.

We would also like to specifically thank our Explorer and above level donors for their support.
