

## Bring Your Own Device (BYOD) Participation Form

441.5- Exhibit

**The purpose of completing this Participation Form is to register the device and determine the number of students using a personal computing device (PCD) during the current school year.**

I plan to allow and encourage my child to use their personal computing device for instructional purposes in the Rib Lake School District. I understand that use of personal computing devices will be permitted under the provisions of Board Policies.

I acknowledge that my child's personal computing device meets the minimum device recommendations (both hardware and software) as outlined in the additional BYOD Recommendations and Considerations document to fully participate in the learning activities that are part of my child's courses, and to take advantage of the digital instructional resources available to Rib Lake School District students.

Smart phones, mini-tablets, and other Web-enabled handheld devices inherently possess certain limitations. While use of these devices is not explicitly forbidden, such a device should not be the sole computing device used by your child. **A BYOD Participation Form should NOT be submitted for smart phones, mini-tablets, or other Web-enabled handheld devices not listed on the BYOD Recommendations and Considerations document.**

I understand that if I allow my child to use their personal computing device, Rib Lake School District is not responsible for any device or data loss, theft, damage or other associated costs replacement or repair incurred during the school day or at home as a result of participation.

I understand that Rib Lake School District staff will be unable to store, support, or troubleshoot personal computing devices. My child named below will take full responsibility for their personal device and will appropriately secure all devices when not in use.

I understand that access to the Rib Lake School District wireless network will be provided and required for filtered Internet access. Access through cellular networks does not provide the same measures of filtering. Students should only use the Rib Lake School District network (not private cellular service) for Internet access while on Rib Lake School District property.

I understand that use of personal computing devices on the Rib Lake School District network is a privilege that supports school appropriate learning and that inappropriate use of personal computing devices may result in denial of use.

**A signed participation form is required to utilize a personal device on the Rib Lake School District network. Access will be denied on the system until a signed participation form and Internet Consent Form is on file with the District Technology Coordinator.**
