

Mental Health Awareness Month

NEVER LET
a STUMBLE
IN THE ROAD
BE THE
END OF YOUR
JOURNEY

Suicide Overview

Suicide is a serious problem in Wisconsin. Suicide is the 11th leading cause of death in the state, and the second leading cause of death due to injury. Over the last 10 years, the number of suicides each year continues to increase. Suicide and people thinking about suicide cause a lot of pain for communities, families, and individuals. For every death by suicide, there are more than 10 emergency department visits and hospitalizations for self-inflicted injury, and this does not include the number of people in Wisconsin who go to outpatient clinics or do not seek medical treatment following a suicide attempt.

Some populations and communities have a higher risk for suicide and suicide attempts. Men are at a greater risk of dying from suicide at all ages. The age group at greatest risk of suicide for both men and women is 45-54. Another age group with high rates of suicide is men 85 and older. Other groups at higher risk include non-Hispanic Whites, American Indians, people with low education attainment, veterans, divorced individuals, and those living in a northern and western region of Wisconsin. It is important, especially for those at greater risk of dying from suicide, that everyone can feel comfortable seeking help.

Teens have the highest rates of self-inflicted injuries. Among Wisconsin high school students, one out of seven have seriously considered attempting suicide. High school students of ethnic and racial minority background are more likely to have suicidal thoughts and behaviors than their classmates.

During the 2007-2011 time periods, the three primary means of suicide in Wisconsin were firearms (45.4%), hanging, strangulation, or suffocation (25%), and poisoning (19.5%). The primary reasons people were hospitalized or in the emergency department for self-injury were poisoning (67.1%) and injury from sharp instruments (21.5%).

Six out of 10 people who died from suicide had an indication for a current depressed mood, and more than half had an indication of a current mental health problem. In Wisconsin, nearly one in four adults reported four or more poor mental health days in the last month. Similarly, nearly three in ten high school students reported that their mental health was not good four or more days in the past month.

Adverse childhood experiences (ACEs) considerably increase the risks of suicidal behaviors. In one study it was found that nearly two-thirds (64%) of suicide attempts among adults were attributable to ACEs and 80% of suicide attempts during childhood/adolescence were attributed to ACEs. Researchers have found that toxic stress during childhood, such as ongoing childhood abuse or neglect, impacts how the brain works, which makes it harder to resist impulses and increases the likelihood of engaging in risk behaviors. Data shows that 57% of Wisconsin residents have at least one ACE, which makes it clear that Wisconsin needs to continue exploring the connection between childhood adversity and suicide.

Summer Mental Health Event in Rib Lake

Youth Mental Health First Aid - An 8-hour course that gives people the skills to help someone who is developing a mental health problem or experiencing a mental health crisis. Just as CPR helps you assist an individual having a heart attack - even if you have no clinical training - Mental Health First Aid helps you assist someone experiencing a mental health related problem. In the Mental Health First Aid Course, you learn risk factors and warning signs for mental health and addiction concerns, strategies for how to help someone in both crisis and non-crisis situations, and where to turn for help. You will gain a basic understanding of what different mental illnesses and addictions are, how they can affect a person's daily life, and what helps individuals experiencing these challenges get well.

Friday June 8 2018
8:00 am - 4:30 pm
Rib Lake Elementary School

Professional staff in attendance will receive a stipend of \$125.00. Support staff will receive a stipend of \$75.00. Lunch will be provided.

Registration: May 1, 2018 - May 15, 2018

This is a county wide endeavor and seating and materials are limited so register early.

- For more information, see Michelle or Elizabeth
